EDUCATION

University of Illinois Urbana-Champaign | *B.S. Econometrics & Quantitative Economics; Statistics minor*
May 2027

GPA: 3.8/4.0 | Credentials: FRM Part I Candidate; CFA Level I Candidate

Relevant coursework: Financial Econometrics, Financial Risk Management, Interest Rate Risk, Foreign Exchange Risk, Macroeconomics, Probability, Statistical Programming in R

FINANCE & TECHNICAL SKILLS

Finance & Reporting: financial reporting and analysis, variance and trend analysis, reconciliation, data quality and validation, dashboard reporting

Risk Measurement: VaR and Expected Shortfall, stress testing, IRRBB and ALM, PD modeling, SR 11-7 model validation

Analytics: econometric modeling, forecasting, probability and statistics, variance and trend analysis

Tools: Python, SQL, R, Excel, Power BI, Tableau, Bloomberg Terminal, PowerPoint

SELECTED FINANCE PROJECTS

Banking ALM, IRRBB & FTP Regulatory Engine | *Independent Project* **Sep 2026 – Present**

- Building a Python/SQL asset-liability management engine aligned with SBV Circular 83/2025/TT-NHNN and Basel III IRRBB; calculates repricing gaps, ΔNII , and ΔEVE under prescribed interest-rate shocks using bank disclosures and government-bond data.
- Designing funds-transfer-pricing and liquidity-risk modules to allocate funding costs by tenor, analyze liquidity gaps and concentrations, and produce ALCO dashboards for limit utilization and stress outcomes.
- Mapping Circular 14/2025/TT-NHNN against Basel II and Basel III for market and counterparty credit risk; documenting assumptions, validation tests, and model limitations.

FRTB Market Risk Engine | *Python* **May 2026**

- Built a regulatory risk engine producing daily 99% VaR, 97.5% Expected Shortfall, stress metrics, and limit-monitoring outputs for a multi-asset portfolio (SPY/TLT/GLD) including long-duration Treasury (fixed-income) exposure.
- Implemented Basel FRTB backtesting and stressed-window validation to identify exceptions, assess model accuracy, and support audit-ready reporting controls.

Credit Risk PD Modeling & Model Validation | *Python*

- Built a probability-of-default model on 250K Lending Club records under an SR 11-7 framework, including data-quality checks, leakage review, out-of-time testing, and model monitoring.
- Compared WOE scorecard and XGBoost models, improving AUC from 0.643 to 0.686 while testing calibration and population stability (PSI).

EXPERIENCE

Tram Anh Co. Ltd | *Financial Analysis Intern* **Jun 2025 – Aug 2025**

- Delivered monthly financial and management reporting in Excel, integrating revenue and sales data across imported product lines and three channels into dashboards covering a \$500K+ annual revenue book.
- Performed variance and trend analysis on revenue, product profitability, channel performance, and exposure concentrations, highlighting material drivers and risks for quarterly management review.
- Reconciled monthly sales and revenue records across four sourcing countries into a validated single-source dataset, improving reporting completeness and consistency.

IDX Exchange — Real Estate Co. | *Business Development & Revenue Analysis Intern* **Jan 2025 – May 2025**

- Modeled revenue and account data for client analyses and recommendations that supported deal conversations, grew recurring revenue 20%, and strengthened pipeline prioritization.
- Produced approximately two stakeholder-ready reports and proposals per week, translating financial and operational data into clear management insights.

Applied Technologies for Learning in the Arts & Sciences | *Business Process Optimization Intern* **Jan 2024 – May 2024**

- Standardized three FormBuilder workflows across two UIUC departments, reducing manual processing errors 70% and improving data accuracy 30% through stronger process controls and governance.
- Gathered stakeholder requirements and created process documentation and reference guides, improving data consistency and supporting sustainable cross-department workflows.

Uber Technologies, Inc. | *Product Management Intern*

Dec 2022 – Mar 2023

- Defined requirements with design and engineering for ride monitoring, audio recording, mapping, driver controls, and safety pages supporting the compliant 2023 launch of Uber Teens.
- Led testing and issue triage for safety features, investigating defects and helping keep the target launch on schedule.
